William Caton

| willcatonjr@gmail.com | Coral Springs, FL

Summary

Software developer and tester. Proficient in programming languages & frameworks such as Python, Java, Selenium, Scrapy, Django and PyQt6. Passionate about solving problems through the power of automation and software development.

Experience

Software Tester | 08/2023 - Present | TestBirds | Fort Lauderdale, FL

- Submits detailed bug reports with comprehensive and reproducible documentation with steps that were identified through usability testing.

- Performs exploratory testing to identify usability defects in web and mobile applications, documenting the severity rating from low to critical. Additionally, provides screenshots and recordings of the identified bugs.

- Participates in the compatibility testing of various web and mobile apps, ensuring that the application is functional on different browsers.

Usability Tester | 03/2023 - Present | PlaybookUx | Fort Lauderdale, FL

- Conducts functional tests on various web elements, documenting any defects and reporting UI failures.

- Participates in testing responsiveness and adaptability to various screen sizes, resolutions, and orientations in mobile and responsive web prototypes.

 Participating in early-stage testing (alpha) and external user testing (beta) phases to provide real-world feedback to the market research team members.

Usability Tester | 03/2023 - Present | UserTesting | Fort Lauderdale, FL

- Manual testing of multiple UI elements on the Figma prototypes of web and mobile applications

- Provides concise and honest feedback on front-end logic and UI/UX decisions via Zoom.

- Conducts integration testing, verifying that different software features and components work seamlessly together as intended.
